Muscle stimulation

# KESTRA E2

## EMS Body Sculpting

Cosmetic system · Non-invasive

High-intensity electromagnetic muscle stimulation for muscle toning and a body-sculpting appearance. Two applicators strap directly to the treatment area and run independently, so abdomen, flanks or glutes can be worked in pairs while the client lies still — no operator hand time per pass, which is what makes the treatment economics work across a busy list.

At a glance

### Paired applicators
Two heads run independently on opposing muscle groups.

### Up to 2 Tesla
Field strength adjustable from 0.2 T.

### Automatic and manual
Preset cycling programmes or direct frequency control.

### Quiet handle design
Internal damping against high-frequency vibration.

Electromagnetic body sculpting

# KESTRA E2 technical specification
