Focused ultrasound

# KESTRA H3D

## 3D HIFU System

Cosmetic system · Non-invasive

High-intensity focused ultrasound delivered at fixed depths for a non-surgical lifting and tightening appearance. Each cartridge pairs one frequency to one focal depth, so the operator selects a tissue plane rather than dialling it in — which makes protocols repeatable across a treatment team. One platform covers face and body, with depth-keyed cartridges from 1.5 mm to 13 mm.

At a glance

### Face and body, one unit
Shared console and handpiece; cartridge sets cover both.

### Depth-keyed cartridges
Colour-coded heads; depth and frequency fixed per cartridge.

### 10,000 shots each
Per-cartridge shot counting with consumable tracking on console.

### Trolley console
Drawer storage for cartridges, handpiece in its cradle.
